Malaysian Highway Authority (LLM)

Institution of Surveyors Malaysia (ISM)

Pertubuhan Arkitek Malaysia (PAM)

Institution of Engineers Malaysia (IEM)

Persatuan Pemborong Binaan Malaysia (MBAM)

Introduction

The success of any project endeavour in meeting clients' objectives such as value for every Ringgit spent greatly depends on comprehensive planning, organizing, leading and effective implementation by the project team and also the right utilization of state by the Art Technology.

The speakers from the government and private sectors with varied areas of expertise in project planning and implementation will enlighten seminar participants regarding the importance of applying the right and appropriate management tools in meeting the current and future trends towards a borderless world.

The seminar is organized to address these issues, which will assist organizations and individuals in making better decisions. The topics are carefully chosen to highlight some very important aspects encompassing some of the best practice in the construction industry.

Objectives

- 1) To exchange ideas and keep abreast with current techniques practised globally and new developments in the aspect of project development. It also focuses on the latest and state-of-the-art management technique with regard to construction industry.
- 2) To expose the role of respective governing bodies with regards to the policies in the Project Planning, Budgeting and Implementation for the RMK-9.
- 3) To reduce risks of delayed project delivery and achieve cost optimisation.
- 4) To identify the best practice and methodology in the construction industry.

Who Should Attend?

Government officers, Contractors, Developers, Project management Consultants, Architects, Building Surveyors, Engineers, Land Surveyors, Quantity Surveyors, Project Managers, Property Consultancy & Valuation Surveyors, Planners, Facilities Managers, Academicians, Risk Managers, Bankers & Other Professionals/Decision Makers.
